

All Seasons jambs

If you have a problem with rotted wood jambs,
Dyke Industries has solutions.

In our battle against rot, we continue to offer our lines of Framesaver and vinyl clad jambs:

Framesaver Jambs

Wood jambs with a composite material finger jointed to the bottom to prevent moisture from seeping into the jamb and rotting it.

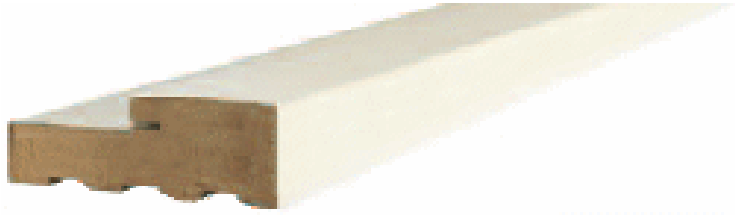

Vinyl Clad Jambs

Wood jambs wrapped in a protective vinyl sleeve to prevent the intrusion of moisture and rotting of the jamb. The vinyl clad does not require painting.

And now, introducing our latest line of rot defense:

All Seasons Jambs

All Seasons jambs

With All Seasons jambs, the entire jamb is made of a composite material, preventing warping, rotting, and splitting.

Jamb Features:

- Closed Cellular Structure – ensures door frame will not absorb or wick moisture
- Easily machined like wood frames, but with twice the screw-holding power
- Primed and ready to accept paint

We carry the following sizes:

4-9/16" jamb, 6⁸ legs

6-9/16" jamb, 6⁸ legs

4-9/16" jamb, 8⁰ legs

6-9/16" jamb, 8⁰ legs
